

## On the Subject of Pigpen Rotations

*Is that alien language or what? And what is with the original text before?*

The process to disarm this module can be found underneath "The Pigpen Cipher" section. If there are any issues, please contact VFlyer#6320 on Discord.

### Getting the Key for the Caesar/Rotation Cipher

- If there are no batteries on the bomb, the key is 13.
- Otherwise, the key is 26 - (the number of batteries on the bomb).

### The Pigpen Cipher

A	B	C	J	K	L
D	E	F	M	N	O
G	H	I	P	Q	R

### The Process

1. Decrypt the display using the Pigpen Cipher provided.
2. Take the English alphabetical position of each letter decrypted.  
(A=1, B=2, C=3, ..., X=24, Y=25, Z=26)
3. Add the key that you got to each of these.
4. To keep each value between 1 to 26 inclusive, Add or subtract 26 to those not between 1-26 inclusive.
5. Use each of the values as positions to convert back into an English letter.  
(1=A, 2=B, 3=C, ..., 24=X, 25=Y, 26=Z)
6. Encrypt the result back in Pigpen Cipher and type that in.

If you did the process correctly. The module will disarm upon pressing the "Submit" button. Otherwise you will receive a strike.
