

## On the Subject of Pickup Identification

*This really is a weird treasure hunt.*

The module consists of a keyboard, a text box, a display with an image of with an item pedestal and a red question mark, 3 unlit light bulbs, and an image of Isaac crying.

To initiate a stage, press the border on which the item pedestal is located. The item pedestal will then reveal a random collectable from the game **Binding of Isaac: Afterbirth+**.

The reveal will last for **7.5 seconds** before returning to its original image. Relay as much information on the collectable shown. You can only press the border once per stage.

After the packet returns to its original image, you are now able to type text in the text box. Type the **exact** name of the collectable shown in the module. Submit your answer by pressing the **Enter** button on the keyboard.

If the input given was correct, a light bulb beside the border will light up. If the input given was incorrect, all the lights bulb will turn off, and a strike will be given.

Light up all the light bulbs given to solve the module.

### Note:

- Butter Bean and Wait What? has a similar sprite. Submitting any of its name will serve as the correct answer.
- Some names can have multiple images.

## Index: Keyboard Guide

This keyboard replica functions differently than normal.

## Keyboard Functions

- **Shift** – Replaces the current set of typable keys to its alternative. The keyboard will not revert to the previous set when pressing any typable key after pressing **Shift**.
- **Backspace** – Removes the rightmost character in the text box.
- **Enter** – Submits the answer written on the text box. It only works when you have pressed the border.
- **Any Typable Key** – Types the character on the text box.
- **The Remaining Keys** – It does nothing. Only for decoration purposes.
