

## On the Subject of Benedict Cumberbatch

*More like Bouncystick Crapplepatch...*

- The module consists of two rolodex devices and a submit button.
- To disarm the module, calculate the correct suffix to go with the given prefix on the rolodex screen using the operators and the tables below.
- Submitting a wrong name will cause a strike.

### Forename

- If the prefix on the left screen is Broccoli, Buffalo, Syphilis or Cadbury, ignore the below operators and use 0 as your index. Cycle the suffixes on the cards to determine which list you are using.
- Otherwise, starting at 0, use the operators below to calculate the index value. If at any point your answer becomes greater than 9, modulo 10.
- For each of the following statements that are true, add 1:
  - The bomb has a parallel port.
  - The serial number contains a vowel.
  - More than half of the modules on the bomb have been disarmed.
- For each of the following statements that are true, add 2:
  - The bomb has a serial port.
  - The serial number does not contain a vowel.
  - Half or fewer of the modules on the bomb have been disarmed.
- For each of the following statements that are true, multiply by 2 and add n:
  - The bomb has a lit FRK indicator ( $n=3$ ).
  - There are more digits than letters in the serial number ( $n=4$ ).
  - The last digit of the serial number is even ( $n=5$ ).
- For each of the following statements that are true, multiply by 3 and add n:
  - The bomb has an unlit NSA indicator ( $n=6$ ).
  - There are more letters than digits in the serial number ( $n=7$ ).
  - The last digit of the serial number is odd ( $n=8$ ).
- Compare your final index value with the table on page 3. The given suffix is the correct answer.

## Surname

- If the prefix on the right screen is Bonaparte, Oxfordshire, Talisman or Lingerie, ignore the below operators and use 0 as your index. Cycle the suffixes on the cards to determine which list you are using.
- Otherwise, starting at 0, use the operators below to calculate the index value. If at any point your answer becomes greater than 9, modulo 10.
- For each of the following statements that are true, add 1:
  - The bomb has a stereo RCA port.
  - The bomb has more than two batteries.
  - The bomb has a duplicate port.
- For each of the following statements that are true, add 2:
  - The bomb has an RJ-45 port.
  - The bomb has fewer than two batteries.
  - The bomb has no duplicate ports.
- For each of the following statements that are true, multiply by 2 and add n:
  - The bomb has a lit FRQ indicator (n=3).
  - The bomb has more than one type of port (n=4).
  - The bomb has more than one battery holder (n=5).
- For each of the following statements that are true, multiply by 3 and add n:
  - The bomb has an unlit MSA indicator (n=6).
  - The bomb only has one type of port (n=7).
  - The bomb has no battery holders (n=8).
